Yale Fire Safes

Like every Yale quality assured product, the new range of Yale Fire Safes has been designed with your peace of mind in focus. The entire range has been built and thoroughly tested to withstand intense heat and humidity, leaving your most precious documents in good hands. The Yale Data Fire Safe contains an additional "safe within a safe" insulation layer. This protects passports, paper documents and extra sensitive digital data, whether they are on an external hard-drive, CD ROMs, DVDs or tapes from fire.

All Yale Fire Safes are equipped with a unique digital security keypad unlike any other on the market today. A scramble number input enables personal codes to be hidden within longer sequences of numbers, whilst additional access codes can be set for one time use, ensuring privacy no matter who is in the room when accessing your safe. These state-of-the-art fire safes have been carefully designed to be worthy of your confidence and the Yale brand name.

State-of-the-art digital touchpad

- Unique touchpad technology
- 1 billion+ digital user code
- Code scramble input function for privacy
- One time access codes
- Silent input option
- 1-48 hours total lockdown mode
- Time lock when wrong code is entered

Easy to operate

- Re-settable 4-12 digital user code
- Low battery alarm signal
- Emergency battery capability

Protection

- Tested to withstand up to one hour of intense fire
- 16mm steel locking bolts
- Hinges protected with 18mm steel dog-bolts

Volume: 41.0 litres

Yale Certified Safes

By incorporating several key elements in to our Certified models we have greatly improved performance. As a result the Yale safes have been awarded Silver Certification in the 'Sold Secure accreditation'

The design scene: fitting into fashionable homes

Research (ASE, Consumer Research, July 2007, UK) shows that people want safes of a convenient size. This is especially important for the growing numbers of individuals living in smaller, homes, where space is at a premium. Research also shows that where possible, most people prefer their safes to be bolted to the floor. All our safes take this fact into account and are fully-lined to further protect their contents. Because safes are often hidden in dark corners, we've also included a more intuitive LCD screen that lights up when entering your PIN, and a bright interior light that comes on when you open the door.

Features

- Electronic Lock with digital keypad
- Blue backlight display
- Laser cut steel door, with auto-opening function (when correct code is entered)
- Reinforced steel hinge
- Brushed aluminium face plate
- Concealed fixing points and mounting bolts included
